# MPTL Example

The MPTL is paid to the landlord on the TPD cycle date following the UC pay date every 28 days (17/10 on 26/10, 17/11 on 23/11). The months award every 28 days recovers some arears each payment. There are 12 monthly payments and 13 TPD cycle payments in a year so we miss one TPD date each year. This occurs when 2 of the TPD occur in the UC payment cycle of the claimant. As above we pay claimant on 17/01 and landlord on 18/01 by 15/02 the claimant has not been paid further UC so this is the TPD cycle we miss. The claimant is paid on 17/02 and landlord receives payment on next following cycle 15/03.
